Organising Societies:

WORLD DIABETIC FOOT DAY 2020

Friday, 15 May 2020

We are pleased to introduce World Diabetic Foot Day, which will be hosted on 15 May at the EWMA 2020 Conference in London, UK.

The objective of World Diabetic Foot Day is to explore what has been achieved so far within the management of the diabetic foot and what remains to be done to further reduce the number of amputations and prevent complications.

The day will have a strong focus on advocacy and will be open to participation by all stakeholders in the field of the diabetic foot: patients, specialists, caregivers, educators and administrators.

All major diabetic foot associations have joined this initiative and will help in shaping the programme in line with their interests and specific points of view.
